

# Affordable Packaging

## 100% Recyclable

### Direct from the Manufacturer

***Single Face Corrugated Paper offers a Versatile and Flexible method of packaging***

*One of the many uses for our Environmentally friendly packaging product is to separate/interleave rows of products for transit on pallets*

*Products are placed onto a pallet and separated in bundles or rows with our single face corrugated paper sheets, the standard pallet size is 1200mm x 1000mm but we can cut to any size to suit your product.*

*A sheet of corrugated paper is placed on the base of the pallet. Products are then stacked in rows. Interleaves are placed in-between rows of products to reduce movement during onward transit.*

***We manufacture our recycled paper in Rolls, Bespoke pieces and Cut Sheets.***

***Single Face is 'one side liner, one side fluting'.***

***If you don't currently use our product and would like to know more, our Sales team here at Charta would be happy to offer any advice, provide a quotation and samples to aid any trials,***

***Give us a call, we are here to help.***
